

Alaska statistical areas

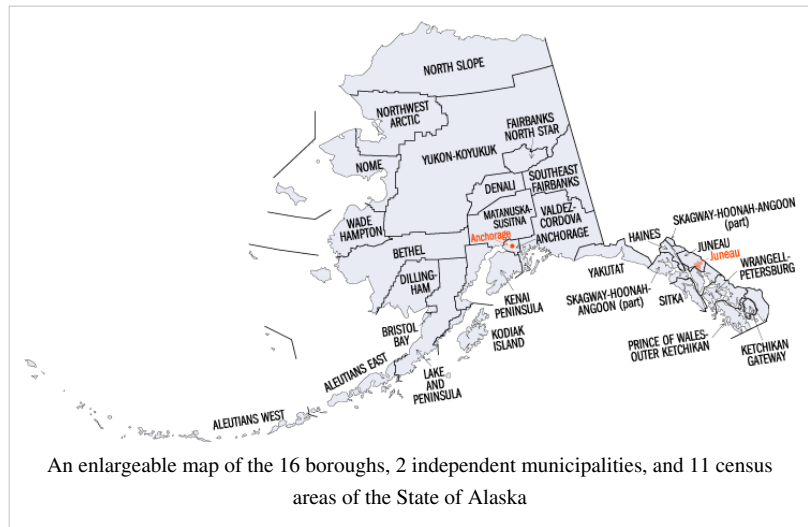

The statistical areas of the United States of America comprise the metropolitan statistical areas (MSAs),^[1] the micropolitan statistical areas (μSAs),^[2] and the combined statistical areas (CSAs)^[3] currently defined by the United States Office of Management and Budget (OMB).

Most recently on December 1, 2009, the Office of Management and Budget defined 1067 statistical areas for the United States,^[4] including two metropolitan statistical areas and three micropolitan statistical areas in the State of Alaska. The table below shows the recent population of these statistical areas, the 16 boroughs, 2 independent municipalities, and the 11 census areas of Alaska.

Table

The table below describes the 5 United States statistical areas, 16 boroughs, and 11 census areas of the State of Alaska with the following information:

1. The core based statistical area (CBSA)^[5] as designated by the OMB.^[4]
2. The CBSA population as of April 1, 2010, as enumerated by the 2010 United States Census.^[6]
3. The borough, independent municipality, or census area.^[6]
4. The borough, independent municipality, or census area population as of April 1, 2010, as enumerated by the 2010 United States Census.^[6]
